In my words: “I chose to study in Paris because it’s a magical city that has something to offer for everyone: art, music,

architecture and literature. Thanks to the UC program I was able to experience real hands on learning by having class at the Louvre and several other museums in Paris. Living in France is definitely an experience that will stay with me forever. “

In my words: “I love traveling and food (especially bread), so the program seemed perfect for me. It allowed me to explore one of the greatest cities on earth while sampling baguettes and helped me complete a few major requirements for my school

and become a bit more fluent in the French language. Plus, I got to visit some amazing museums for free! One semester was not enough in the least!”

In my words: “Paris is a magical city. The city has an incredible history and magnificent culture, starting with their beautiful language. UCEAP is a great program not only because I got help with all the paperwork but because their main concern was my safety.”

In my words: “I chose Paris because I thought the city would make a great home base to travel around Europe from, and it absolutely was. There was so much to do,

so much to see, so much to eat; it is impossible to be bored or hungry in Paris! Study abroad there and see for yourself - this is the best decision you can make in college.”
