

Can a campus in a breathtaking natural setting also be home to six Nobel Prize winners, 12 national institutes and centers, and more than 100 research units? **UC Santa Barbara** is such a campus.

UC Santa Barbara is internationally recognized for its teaching, research excellence and its interdisciplinary programs. Students come to UCSB not only to study hard sciences, but also to pursue humanities and social sciences, such as the multi-disciplinary Global Studies and the variety of unique ethnic studies programs (Black Studies, Chicano Studies, Asian Studies, etc.).

Overlooking California's scenic Pacific coast, its location mid-way down the state leaves you poised for travel north or south.

Take courses in:
Physics, environmental studies, religious studies, engineering, chemistry, biology and marine biology, film studies, geography and more.

UCSB is committed to international education and is the campus where UCEAP began.

Begin your adventure next year at UC Santa Barbara!

Get to know UCSB

Established in 1970, the [Environmental Studies](#) Program at UC Santa Barbara is one of the oldest and largest programs in the nation, and is recognized as one the most successful undergraduate environmental programs in the world. The "green", environmentally conscious spirit is a part of life at UCSB. Daily more than 15,000 cyclists traverse seven miles of bikeways on or adjacent to UCSB to attend classes and campus events. Less than 20 percent of UCSB students drive to campus.

I Heart UCSB

UCSB Reciprocity student from the National University of Singapore pictured with Professor Alan J. Heeger, one of [UCSB's six renowned Nobel Prize winners](#).

"UCSB is a campus with beautiful beaches, wonderful students and excellent teachers. I took courses from the statistics department. I got to communicate and interact with my classmates and my professors a lot. Do take the opportunity to talk to your professors. Teachers at UCSB are really kind and professional."
