

UCEAP Program Evaluation Privacy Statement

All responses to the program evaluation are confidential. The data are collected using a Secure Socket Layer (indicated by the URL <https://www...> as opposed to <http://www...>) and password to authenticate and encrypt your responses.

Your responses will be compiled with all other program participant responses, and only summary statistical data will be distributed. Comments that you include will be made available, and limited, to senior UCEAP managers and UC faculty oversight and review committee members. In spite of every effort to protect your anonymity, in certain circumstances (e.g., a study center with a low enrollment, or by reference to an unusual incident) it may be possible for a reader of some reports to determine the identity of a respondent.

Information gathered in the evaluations is never shared with any individual or organization beyond UCEAP's administration, nor is it used for academic publications or generalized research. Your identity is never linked to your responses. Your responses are used solely for the purpose of assessing some UCEAP program characteristics and their performance from the participant's perspective. Your responses are highly valued and instrumental for improving our programs to better serve students.

If you have questions regarding the uses of the evaluation responses or your privacy please direct them by e-mail to the Research staff.
