UCEAP ACADEMIC INTEGRATION INITIATIVES

The goal of UCEAP Academic Integration initiatives is to make study abroad an integral and accessible part of every undergraduate’s academic experience and to prepare students for entering an increasingly global workplace upon graduation. It aims to demonstrate the feasibility of, and reduce academic barriers to, participation in study abroad for students in all majors.

Academic Integration Department Grants
In support of system-wide and campus initiatives to promote the integration of study abroad programs and coursework into the curricula, UCEAP has supported grants from departments across the UC campuses (see below).

Campus Credit Abroad Databases
In collaboration with the UC Registrars’ Council, UCEAP created a searchable database of previously taken UCEAP courses and the types of credit awarded—including whether students obtained major, minor, or GE credit and in some cases the specific course or area that was fulfilled. We encourage you to use these databases in your advising of students who are interested in education abroad experiences. One of our goals is that departments would post their own historical information and use the previously-approved course data as a basis to consider course articulation and preapprovals for courses taken abroad. At this time we have databases for the following UC campuses: UCB (Pre-Approved Breadth), UCD (Majors), UCD (General Education & Elective), UCI, UCLA, UCM, UCR, UCSB, UCSC, and UCSD. These databases can also be found on eap.ucop.edu/credit.

Discipline/Major Webpages
Academic Integration has developed discipline webpages with curated lists of programs to inform and encourage students of all majors to consider studying abroad. Programs are chosen according to student reviews, a wide availability of courses, and unique academic opportunities within each discipline.

Syllabi Repository Project
In order to facilitate the course approval/pre-approval process and campus access to syllabi UCEAP developed a syllabi repository for UC Construct Programs. These syllabi are available through Box for staff and faculty use.

Program Development Surveys
In collaboration with campus study abroad offices, UCEAP has developed and administered surveys for advisors in several departments in support of discipline-specific program development efforts.
