Physical Examination Record for Foreigner Form

In order to receive the Residence Permit required for the program, all academic year students must complete and pass the **Physical Examination Record for Foreigner**.

Students applying for the “X” visa must complete the physical health exam in the U.S. prior to submitting their visa application to the Chinese Consulate.

All physical exams done outside of China are required to be verified by the Beijing Physical Exam Facility operated by the National Quarantine Bureau. If your documents are incomplete or copies, you will be required to re-take your physical exam in China.

The Chinese government considers health documents valid for only 6 months after completion. The physical health exam must be completed no more than six months prior to the start of the fall term.

Make your physical health exam appointment NOW, because it will take longer than you expect. Take the form, instructions, and sample with you to the appointment.

This form should be coordinated with the Confidential Health History Form, UCEAP Travel Health Course, and the UCEAP Health Clearance Form (available through your Campus EAP Office). However, the Physical Examination Record for Foreigner form will not be submitted to UCEAP.

Be sure your physician completes all sections of the form as instructed on the sample. Original (not photocopied) lab results must be attached and the medical facility must stamp each one with their name and address.

Attach your official passport photo where indicated. The physician and medical facility’s official signature and stamp are required for validity.

All “X” visa applicants need to take copies of the Chinese health form and lab results to the Chinese Consulate with their visa application. **Take all original lab results and documents with you to China.**

- On your photo and the second page of the Chinese health form, an official stamp from the physician and medical facility is required next to the physician’s signature.

- Obtain the ORIGINALES for all your medical tests (e.g. blood, X-rays, etc.) and have the medical facility stamp each one with their name and address.

- Make a copy of the stamped forms and submit the copy with your visa application to the Chinese Consulate. DO NOT give the originals to the Chinese Consulate.
