Yellow Fever Immunization

The Ghanaian government requires travelers provide a valid certificate of immunization against yellow fever in order to enter the country. Upon entry in Ghana, you will be required to show proof of your immunization (your certificate, which should be affixed inside your passport) to Ghana customs officials. Without the immunization you will be forced to return to the United States immediately. You cannot get this immunization after arrival in Ghana; you must be immunized prior to departure. Do not send the Ghanaian Consulate or UCEAP your certificate - keep it with you and present it upon arrival in Ghana.
