

« I learned to appreciate my major much more after studying abroad, and I came back with a new love for science and for people. If you are interested in using your knowledge of science to impact lives, I would highly recommend that you study abroad. »

—Alexandria De La Fuente, UC Davis, Chile

Go Ahead. Stay Ahead. On UCEAP, you can examine unique organisms, habitats, and ecosystems, and find new perspectives in all subfields of biology—from ecology and conservation to modern biochemical research and genetic engineering.

Did you know? 97% of UCEAP students who plan to take courses in their major receive major credit. You too can gain the international experience and cross-cultural competency to enrich your major and succeed in an interdependent world.

Programs for Biological Sciences Majors

This is just a sampling of programs for your major. See the UCEAP website for all your options.

Australia

Marine Biology & Terrestrial Ecology,
Univ. of Queensland
Monash Univ.

Barbados

Univ. of the West Indies

Botswana

Univ. of Botswana (Public Health &
Health Sciences)

Chile

Pontifical Catholic Univ. of Chile
Univ. of Chile

Costa Rica

Tropical Biology & Conservation,
Monteverde Institute

Denmark

Univ. of Copenhagen

England

Univ. of Bristol
Univ. of York

France

Univ. of Bordeaux

Hong Kong

Hong Kong Univ. of Science & Technology
Univ. of Hong Kong

Korea

Yonsei Univ.

Netherlands

Univ. College Maastricht
Univ. College Utrecht

New Zealand

Massey Univ. (Animal Sciences)

Singapore

Biodiversity, NUS
National Univ. of Singapore (NUS)

South Africa

Univ. of Cape Town

Spain

Univ. of Granada

Sweden

Lund Univ.

Turkey

Bilkent Univ. (Molecular Biology & Genetics)
Boğaziçi Univ.

“ My independent research in marine biology enhanced my love of the ocean, opened new doors to research and other fields of study, and was very helpful with writing scientific papers. The program gave me more contacts and opportunities to see what was beyond California coasts and provided insight into another country's home life and culture. It changed my life for the better. I loved it! ”

—Stacy Vega, UC Santa Barbara, Australia
